1-2 years of advanced sub-specialized training (fellowship)

4 year undergraduate degree

Certified by the American Board of Radiology

4 years of diagnostic radiology residency

1 year internship

4 years of medical school

**From MRIs** to ultrasound to mammograms, medical imaging is a powerful medical tool. It's a complex, ever-evolving science, but one doctor is specifically trained to put imaging technology to work saving lives: your radiologist.

Radiologists are the only physicians specially trained in patient diagnosis and care through medical imaging. They help save lives and health care dollars by detecting diseases early and pinpointing effective treatment for cancer, heart disease and countless other illnesses.

*Radiologist — Your physician imaging expert.*
